Career Objective

I have always been fascinated by the idea of programming and coding. Although I did not graduate in CS or IT, I have worked on my technical skills. As you can see on my resume, I have undertaken an internship and completed two projects on IT topics.

During my graduation, I realized the potential of IT and programming. There is so much potential and no boundaries. And the best part about it is that anyone with curiosity can join IT and learn to program. That is why I want to switch from my core.
